CLASSIC

THE ESTABLISHED CLASSIC

IDEAL TACTILE PROPERTIES – highly developed dipping process
HIGH SAFETY – ideal compounding
EXCELLENT GRIP – high comfort

THE ESTABLISHED CLASSIC

■ IDEAL TACTILE PROPERTIES

The highly developed dipping process guarantees constant wall thickness from fingers to cuff. This results in ideal tactile sensitivity and less hand fatigue during even longer operations.

■ SKIN CARE

The glove is lightly powdered with pure cornstarch which makes it easy to don. The multiple washing process (leaching) makes the natural latex glove skin friendly and very comfortable to wear.

■ HIGHER SAFETY

Sempermed's manufacturing process complies with all international quality standards and guarantees the required Acceptable Quality Level of 1.5. The compounding of the Natural Rubber Latex and production technology result in a higher force at break and therefore in a higher safety.

■ EXCELLENT GRIP AND COMFORT

Sensitivity, good control and a safe grip are essential for successful surgery. This glove has a micro-rough non-slip surface to enhance its ability to grip.

TECHNICAL DATA

sempermed® classic

TYPE	Sterile surgical glove for single use, lightly powdered			
MATERIAL	Natural rubber latex (NR)			
COLOUR	White			
GLOVE SHAPE	Fully anatomical with rolled rim			
OVERALL LENGTH/SIZE as per EN 455-2	6 and 6 ½		min. 260 mm	
	7, 7 ½ and 8		min. 270 mm	
	8 ½ and 9		min. 280 mm	
WALL THICKNESS measured in single layer in the palm area	min. 0.16 mm			
IMPERMEABILITY / FORCE AT BREAK as per EN 455-1 / as per EN 455-2	AQL 1.5 / ≥12 N			
DURABILITY in original packaging if stored as per DIN 7716, ISO 2230	5 years			
STERILISATION	Gamma radiation with at least 2.5 Mrad (25 kGy)
